

# Nidec

## Conversion

### ***DIRECTPOWERPS-FLEX60***

Dynamic Flexible Mount All-in-one DC Charger 60kW

Flexible mounting types and small footprint enable installation wherever fast charging is needed

All-in-one architecture coupled with competitive pricing makes DirectPowerPS-Flex60 an economical choice for fleet depots, repair shops and parking facilities

Nidec's history of quality products paired with best-in-industry service offerings result in high uptime and driver satisfaction

# FLEET AND DEPOT CHARGING ANYWHERE

## Features:

- **Compact** – 60kW of power in a small footprint
- **Easy Flexible installation** – Pedestal or wall mounted
- **Dynamic Power Sharing** – Up to 60kW dynamically assigned to each connector during charging
- **Plug Type for any Vehicle** – CCS1 and NACS to 200A output
- **Easy to Repair** – Each 30kW power module only weighs 33lbs. No special tools required
- **Easy to Use** – Start a charging session with App, RFID, Credit Card and Plug & Charge
- **Accessible** – 10” color touchscreen for user interaction within easy reach
- **Any Vehicle** – Wide output range from 150-1,000VDC
- **Flexible Connectivity** – Bluetooth, Wi-Fi, Ethernet & 4G
- **Standards** – UL 2202-2022, UL 2231, FCC Part 15B, ISO 15118-1
- **Certifications** – ETL, FCC, EnergyStar, CTEP

## Value Added Services:

**DIAGNOSTICS** – Nidec By Your Side (BYS) remote diagnostics system for supervision, maintenance and troubleshooting

**SERVICE** – 24/7 Remote support and on-site service available in 3 service levels

**DYNAMIC LOAD MANAGEMENT** – Power management dynamically assigned across all stations on a site

**CUSTOMIZATION** – Branding colors and logos to match customer needs

## Dynamic Load and Power:

Dynamic power sharing enables site owners to reduce capital costs and increase profitability. Rapidly charge more vehicles with fewer chargers while efficiently monetizing all available site power.
